<i>Additional Information with respect to the Index</i>	<p>Inclusion Criteria</p> <p>The Amun Sygnum Platform Winners Index (MOON) is an automatically rebalancing index aimed to track the performance of the largest native Crypto Assets of original protocols and may at times include Crypto Assets not specifically included in the above description.</p> <p>Additional Crypto Assets may satisfy the eligibility criteria for inclusion on the Amun Sygnum Platform Winners Index</p>

(MOON), and Crypto Assets currently included in the Amun Sygnum Platform Winners Index (MOON) may fail to satisfy such criteria. If certain Crypto Assets do not satisfy the required eligibility criteria, this may lead to a situation where less than the original number of Crypto Assets actually form part of the Underlying Index. Furthermore, the weighting factors applied to each included Crypto Assets may change. In addition, the methodology for determining the composition and weighting of the Amun Sygnum Platform Winners Index (MOON) may be changed, for calculating their respective values in order to assure that the Amun Sygnum Platform Winners Index (MOON) represents an adequate measure of market performance or for other reasons. Any such changes could adversely affect the market value of the Products.

Newly-forked assets have separate conditions that they must meet in order to be eligible for participation or for inclusion in the Amun Sygnum Platform Winners Index (MOON).

Deviations from the Index Methodology

Each Product issued by the Issuer is intended to achieve a return which corresponds generally to the performance, before fees and expenses, of the designated underlying(s) as published by the Publishing Party. There is no guarantee that the Index Calculation Agent will compile the Amun Sygnum Platform Winners Index (MOON) accurately. Neither the Publishing Party nor the Index Calculation Agent provides any assurance or accepts any liability in relation to the quality, accuracy or completeness of data in the Amun Sygnum Platform Winners Index (MOON), and does not guarantee that it will be in line with the described index methodology. The Issuer's role, as described herein, is to provide a return based on the relevant data provided to it. Consequently, the Issuer does not provide any guarantee for index provider errors. Errors in respect of the quality, accuracy, and completeness of the data may occur and may not be identified and corrected immediately. As a result, gains, losses or costs associated with index-related errors will be borne by the Investors.

See “—Data Redundancy”.

The Index has no Operating History

The Amun Sygnum Platform Winners Index (MOON) is a new index and as such has no operating history. The Index Sponsor retains substantial discretion to change the methodology and data sources that are used to calculate the Amun Sygnum Platform Winners Index (MOON). The Amun Sygnum Platform Winners Index (MOON) could be calculated in a way that adversely affects the value of the Products.

Future Developments and Tracking of the Price of Crypto Assets by the Amun Sygnum Platform Winners Index (MOON)

There is no guarantee that the methodology currently used by the Amun Sygnum Platform Winners Index (MOON) will appropriately allow the Amun Sygnum Platform Winners Index (MOON) to track the price of Crypto Assets in the future. Additionally, the Index Calculation Agent has discretion at any time to change the methodology used to calculate the Amun Sygnum Platform Winners Index (MOON), guidelines used to select trading venues from which trading data is sourced for inclusion in the Amun Sygnum Platform Winners Index (MOON), and trading venues themselves.

Data Redundancy

The Issuer, the Administrator and the Product Calculation Agent specified in these Final Terms rely on the Index Calculation Agent to provide relevant index data on daily basis. The Index Calculation Agent has established index calculation disruption procedure to ensure that in case of index disruptions, clients are kept up-to-date and are given specific and understandable explanations for decision directly relating to the disruption, index calculation continues as soon as possible and that Internal processes are not disrupted. In case of Market Disruption Event when pricing data is not available, there is no guarantee that Index Calculation Agent would be able to provide index

calculations needed for the Issuer, the Administrator or the Product Calculation Agent to perform its duties and obligations under the General Terms and Conditions and otherwise described in this Base Prospectus.

In the case of a major disruption, the day will be considered a non-dealing day. There are no provisions for an alternative index provider.

Rebalancing

The Amun Sygnum Platform Winners Index (MOON) used to price Products is subject to rebalances of the allocation on a quarterly basis and changes to the index calculation methodology. This includes, but is not limited to, changes in the eligibility criteria, data sources or calculation partners.

Tracking Error and Execution Risk

As part of its daily operations, the Issuer may engage in the trading of Crypto Assets OTC and on exchanges. Scenarios involving such trades include, but not are limited to, rebalancing, where the allocation of the Underlyings are rebalanced to meet the new allocation requirements, forks, where newly-forked Crypto Assets collected may be sold at the next rebalance, and Airdrops, where airdropped assets may be sold at the next rebalance. Slippage may occur when the Issuer executes these trades, which may impact the value of the Collateral.

For Products that are related to the Amun Sygnum Platform Winners Index (MOON), at the time of rebalancing, execution may not precisely match the index allocation due to discrepancies between the execution price and the price used to compute the Amun Sygnum Platform Winners Index (MOON). This may result in a loss of value for Investors.
