

FINAL TERMS

PROHIBITION OF SALES TO EEA RETAIL INVESTORS – The Products are not intended to be offered, sold or otherwise made available to and should not be offered, sold or otherwise made available to any retail investor in the European Economic Area (**EEA**). For these purposes, a retail investor means a person who is one (or more) of: (i) a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, **MiFID II**); (ii) a customer within the meaning of Directive (EU) 2016/97 (**IDD**), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or (iii) not a qualified investor as defined in Regulation (EU) 2017/1129 (the **Prospectus Regulation**).

FINAL TERMS DATED August 07, 2020

AMUN AG

(incorporated in Switzerland)

Issue of

320,000 Products (the **Products**)

pursuant to the Issuer's

Exchange Traded Products Programme

This document constitutes the Final Terms of the Products described herein.

PART A – CONTRACTUAL TERMS

Terms used herein shall be deemed to be defined as such for the purposes of the General Terms and Conditions of the Products (the **Conditions**) issued by Amun AG (the **Issuer**) set forth in the Base Prospectus dated 13 November 2019 (the **Base Prospectus**). This document constitutes the Final Terms of the Products described herein and must be read in conjunction with the Base Prospectus (and any supplement thereto). Full information on the Issuer and the offer of the Products is only available on the basis of the combination of these Final Terms and the Base Prospectus. The Base Prospectus (together with any supplement thereto) is available for viewing at the registered office of the Issuer and on the website of the Issuer (<http://amun.com/en/ir#prospectus>) by selecting Base Prospectus. The Final Terms will be available for viewing at the registered office of the Issuer and on the website of the Issuer (<http://amun.com/en/ir#final-terms>) by selecting Final Terms and the respective Security Code.

The Base Prospectus, together with the Final Terms, constitutes the listing prospectus with respect to the Products described herein for the purposes of the listing rules of the SIX Swiss Exchange. In accordance with article 58a of the Listing Rules of SIX, the Issuer has appointed Homburger AG, located at Prime Tower, Hardstrasse 201, 8005 Zurich, Switzerland, as recognised representative to file the listing application with SIX.

Additional information related to staking	<p>General Information about Staking</p> <p>Staking is the process of validating transactions on the Tezos blockchain through the use of committed deposits on the network. Every transaction on any blockchain requires validation from a node. In the case of proof of stake networks such as Tezos, this can be done without significant computing power by proving that the node is holding a certain amount of assets referred to as a roll.</p> <p>Due to its Delegated Proof of Stake model, those that stake on the Tezos network are involved in the validation of new transactions and the creation of new blocks in the Tezos blockchain. Delegation is the process by which a user's Tezos (XTZ) are staked on their behalf by a third party thus removing the complexities involved in staking for oneself.</p> <p>Similar to mining, these actions are incentivized through by in-kind payments, known as staking rewards, from the network for the services performed. A portion of the collateral from this series</p>

will be used by the Custodian's nodes to authenticate transactions on the Tezos blockchain.

In order to perform this function on the Tezos blockchain in its delegated proof of stake system, staking bonds must be posted. These staking bonds are locked in a 'hot' wallet (online and connected to the internet) which functions as the collateral for validating transactions, and also allows staking participants to participate in the governance of a network. The network ensures that stakers who break the rules of the protocol, lose a percentage of their staked bond. An example of such a scenario would be if a staker attempted to propose two blocks (called "double baking") at the same time.

Staking rewards for any given network can vary tremendously based on the value of the network, the exchange rate of the crypto assets, such as Tezos (XTZ), to USD, the amount staked, the processing rate and the number of transactions on the network.

For the risks specific to Tezos (XTZ) generally and additional information on staking, see the First Supplement to the Base Prospectus dated 15 April 2019.

Staking in the Case of Series AXTZ

In the case of this Series AXTZ, the Custodian will post the staking bond required as part of the Delegated Proof of Stake model so that the Tezos (XTZ) in the collateral pool remains in cold storage and is not subject to losses due to any incorrect actions on behalf of the delegated staker. The Underlyings of, and Collateral for, the Products of this Series AXTZ will be held in cold storage per Conditions of the Product.

Any staking rewards paid out as a result of the use of the Collateral for staking will be added to the total value of the Collateral less any applicable fees and commissions (see above at "Amount of any expenses and taxes specifically charged to the subscriber or purchaser"). Historically, staking rewards on the Tezos network have been 7-8% p.a.

Specific Risks Related to Staking

Staking Exchange Rate Risk

Rewards for staking on the Tezos network are received in-kind in the native currency of Tezos (XTZ). Given the often-volatile nature of cryptocurrencies, there is the possibility that XTZ's relative value compared to other popular currencies such as USD, EUR, and CHF could change drastically over time. This exchange rate could affect effective yield of staking when denominated in these aforementioned currencies.

Timeline Risks

Rewards for staking on the Tezos network are paid out to staking participants at intervals of approximately 21 calendar days. Liquidation of holdings mid cycle could result in an investor forfeiting the benefit of any accumulated staking rewards for that period.

Inclusion of a deposit in a staking pool can take up to 21 calendar days to begin producing staking rewards. Significant changes to the collateral pool of the products could adversely effect expected yields.
