### WHY ARKB?

#### Tool For Diversification

Add diversification to a portfolio by adding an asset with low correlation to traditional assets.

#### Exposure without Complexity

Regulated access to one of the leading digital assets without mastering arcane details of how to safely trade or store them.

### INVESTMENT OBJECTIVE

The Fund seeks to track the performance of bitcoin, as measured by the performance of the CME CF Bitcoin Reference Rate – New York Variant (the "Index"), adjusted for the Trust's expenses and other liabilities.

\* Bitcoin cold storage refers to the practice of keeping bitcoins in secure offline environments to safeguard them from potential online threats of hacking and theft. Cold storage provides vital protection for both long-term holders and investors against the numerous risks posed by malicious actors online. By keeping bitcoin holdings entirely offline or "in cold storage", users limit potential attack vectors that could compromise funds.
