Dare to Diversify: Guide to Crypto Indexing

Why Crypto?

Crypto is the first asset class designed for the digital age

- In an era where we spend much of our lives online, digital assets represent an entirely new way to create, transfer, and store value more efficiently, more directly, and at lower cost.
- Digital assets provide access to decentralized technology platforms that can be used to create new goods, services, and businesses.
- Web2 (“the internet”) revolutionized how business is done - both the ways in which goods and services are created or delivered and the goods and services themselves.
- In the same way, we believe Web3 (“crypto” or “blockchain”) also presents a revolutionary technology that will transform all aspects of economic activity.
- Just as the internet presented a once-in-a-generation investment opportunity, we believe now is the time to add digital assets to a portfolio both for their unique investment properties - they generally have low correlation to other assets - and for their growth potential.

Why Baskets?

Baskets transform investment objectives into investible portfolios

- A basket is a single investment product that offers a curated mix of digital assets, tailored to achieve specific investment objectives. Baskets simplify crypto investing by providing diversification, allowing investors to capture market trends while managing risk—all without needing in-depth knowledge of individual assets.
- They also help mitigate the uncertainty of investing in a new, sometimes volatile, asset class. By offering a diversified selection of crypto assets, baskets can help smooth out overall volatility and increase the chances of holding some of the sector’s stand-out performers.
- Rather than taking on the daunting challenge of identifying future winners, basket investors can focus on the broader growth of crypto as both a technology and an asset class, choosing the strategy that best aligns with their personal objectives.
- Some may aim for faster, more aggressive growth through emerging assets with high potential, while others prefer a steadier approach by investing in established leaders poised for the next phase of development. In either case, baskets make navigating the crypto space simpler and more efficient.

Picking a winner in crypto means picking the asset class

- Top-performing assets vary substantially from one year to the next; holding a basket removes the pressure of trying to pick the winners in advance. The highlighted assets demonstrate the dramatic year-to-year performance swings, demonstrating the volatility that persists in the crypto market.

It's Hard to Pick a Winner in Crypto

Why 21Shares?

The market leader in crypto investing

- 21Shares offers the broadest suite of crypto investment products in the world with over **50 products** and approximately **\$6 billion in assets under management (AUM)**.
- In addition to single asset trackers, tactical strategies, and inverse products, we also offer the most robust selection of crypto baskets on the market.
- 21Shares' first Exchange Traded Product (ETP) was a basket launched in 2018, the 21Shares Crypto Basket Index ETP (HODL). Not only was it our first ETP, but it also happened to be the very first crypto basket product offered in Europe.

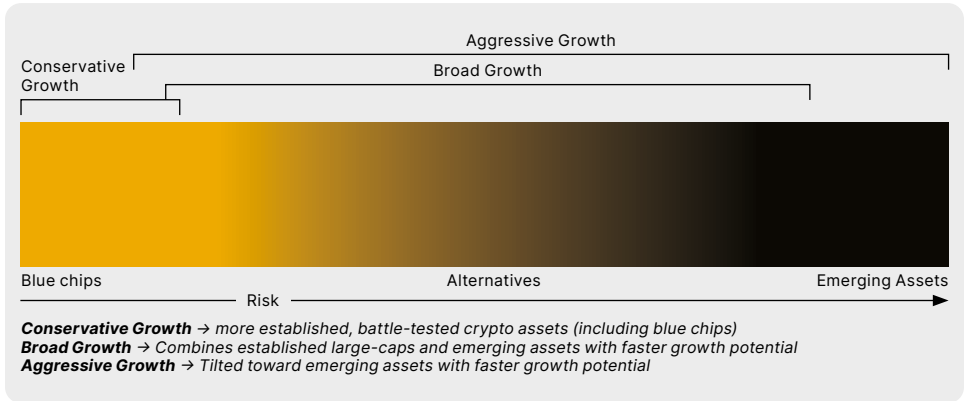

Fun Fact: HODL, is derived from the misspelling of "hold", and in the context of crypto it has commonly come to stand for "Hold on for dear life" amongst investors!

- Today, HODL is one of the largest crypto products on the market, with over \$150 million in AUM.
- But HODL was just the beginning. Over the last 6 years, 21Shares has built the most robust and diverse suite of indexed digital asset products around, giving investors the opportunity to achieve their financial objectives through simple, easy, and proven products.

21Shares Index ETP Range: Crypto Diversification, Simplified

Our basket solutions are designed to satisfy a range of investment goals, offering lower-risk exposure to established assets, higher-growth potential in emerging assets, and precision tools for more specific investment objectives:

Crypto Market Coverage and Investment Objective

Introducing the 21Shares Index ETP Suite

21Shares Future of Crypto Index ETP

Key Product Features

Product Name & Ticker	21Shares Future of Crypto Index ETP (FUTR)
ISIN	CH1382892102
Fee	1.49%
Listing Date	October 10, 2024
Assets Under Management	N/A
Index Provider	MarketVector Indexes
Rebalancing Frequency	Quarterly
Index Methodology	Link

Data as of September 30, 2024

Highly diversified exposure: Includes approximately 20–35 holdings, ensuring broad exposure across both current market leaders and emerging sectors driving the future of crypto.

Balance established assets and growth potential: By blending established and emerging assets, FUTR offers a balance that provides stability while still allowing for significant upside in high-growth sectors.

Sector-based approach: Simplified crypto investing by focusing on key sectors, allowing you to capitalize on the most promising areas of the digital asset ecosystem without needing deep technical knowledge.

Ideal for investors seeking exposure to high-growth sectors, in addition to battle-tested assets and a portfolio that evolves alongside the fast-changing digital economy.

21Shares Crypto Basket ETP

Key Product Features

Product Name & Ticker	21Shares Crypto Basket Index ETP (HODL)
ISIN	CH0445689208
Fee	2.5%
Listing Date	November 20, 2018
Assets Under Management	\$166,212,500
Index Provider	MarketVector Indexes
Rebalancing Frequency	Monthly
Index Methodology	Link

Concentrated yet diversified: With just five holdings, HODL simplifies crypto investing by delivering targeted exposure to a small but impactful basket of leading digital assets.

Focus on blue-chip assets: With over 85% of the portfolio in Bitcoin and Ethereum, HODL taps into the proven resilience of these market leaders, providing relative stability.

Proven staying power: Has demonstrated resilience through various market cycles, consistently providing exposure to top assets across periods of volatility and growth, proving its ability to weather market turbulence.

Ideal for investors looking for concentrated exposure to the largest and most established cryptoassets while still capturing the growth potential of leading large-cap alternatives.

21Shares Crypto Basket Equal Weight ETP

Key Product Features

Product Name & Ticker	21Shares Crypto Basket Equal Weight ETP (HODLV)
ISIN	CH1135202161
Fee	2.50%
Listing Date	September 28, 2021
Assets Under Management	\$7,675,844
Index Provider	Vinter
Rebalancing Frequency	Quarterly
Index Methodology	Link

Data as of September 30, 2024

Concentrated but well-balanced: Exposure to five market-leading assets, with an equal weighting strategy that ensures balanced investment across all holdings.

Beyond blue-chips: Equal weighting gives greater emphasis to non-blue-chip assets, amplifying growth potential compared to a market-cap-weighted approach.

Broad yet aggressive growth: Broad exposure with a tilt towards aggressive growth, driven by its equal weighting approach, allowing investors to capture upside from alternative cryptoassets.

Ideal for investors looking to tap into both established market leaders and emerging opportunities, maximizing growth potential.

Sygnum Platform Winners Index ETP

Key Product Features

Product Name & Ticker	Sygnum Platform Winners Index ETP (MOON)
ISIN	CH0508793459
Fee	2.50%
Listing Date	December 3, 2019
Assets Under Management	\$45,398,910
Index Provider	Vinter
Rebalancing Frequency	Quarterly
Index Methodology	Link

Well-diversified exposure: Provides exposure to a concentrated yet diversified selection of ten leading crypto assets, ensuring a balance between stability and growth potential.

Focus on non-blue chips: Places less emphasis on established blue-chip assets like Bitcoin and Ethereum, focusing more on emerging, high-growth infrastructure assets.

Broad Growth: Leverages forward-looking metrics such as developer activity and public interest to achieve broad growth opportunities across the market, beyond simple market cap weighting.

Ideal for investors looking for exposure to the top ten digital assets, not only weighted by market cap but also by forward-looking metrics such as trading volume, public interest, and developer activity.
