

One token. Two yields.

JITOSOL

Issued by the Jito Network, JitoSOL has established itself as the dominant liquid staking asset within the Solana ecosystem. It is known for being the first to provide a two-way yield structure.

By swapping SOL for JitoSOL, the Jito Network keeps full exposure to the price of SOL while automatically earning two types of rewards: standard staking interest plus a "bonus" share of the network's transaction tips. The result is full SOL price exposure with a built-in yield component and no operational complexity.

INVESTMENT CASE FOR JITOSOL

Powered by one of the highest-performing networks for real-world financial activity

Solana is one of the few blockchains where real-world economic activity already runs at scale. Its speed and low costs support live payments, trading, and an expanding set of institutional and tokenization use cases. This positions the network as production-grade financial infrastructure and a viable competitor to Ethereum. JitoSOL provides this same Solana exposure, but in a staked form, allowing investors to participate in the network's growth while earning the native economic returns generated by securing and operating the network.

Leveraged by Solana's edge in payments, tokenization, and institutional use

Solana has become one of the leading blockchains for institutional payments and tokenization. Firms including Visa¹, PayPal², Revolut³, Franklin Templeton⁴ and JP Morgan⁵ use the network for US dollar payments and tokenized funds issuance, drawn by its speed, low fees, and ability to operate at scale. This adoption reinforces Solana's role as a key platform linking traditional finance with onchain markets.

Higher expected return on the same SOL exposure

While standard Solana staking ETPs capture baseline network rewards, the JITOSOL-backed ETP is engineered to optimize total return. Beyond the conventional staking yield, this structure systematically captures additional revenue derived from network transaction fees and prioritization. This creates a dual-income stream designed to outperform the standard staking benchmark, maximizing the efficiency of the capital deployed without altering the underlying SOL exposure.

21SHARES JITO STAKED SOL ETP

The 21shares Jito Staked SOL ETP (JSOL) provides a liquid, transparent vehicle for investors to access JITOSOL via their existing bank or broker, capturing Solana's market potential alongside the enhanced rewards provided by the JitoSOL liquid staking mechanism.

Within the United Kingdom, investments in crypto exchange-traded notes (cETNs) are classified by the Financial Conduct Authority (FCA) as Restricted Mass Market Investments (RMMIs) and are considered high-risk and complex products. You should not invest unless you're prepared to lose all the money invested. cETNs are highly volatile, and you are unlikely to be protected if something goes wrong. These products are not covered by the UK Financial Services Compensation Scheme (FSCS) or the Financial Ombudsman Service (FOS). This is not a recommendation to invest. Any investment decision should be based solely on the official offering documents of the Issuers (such as the approved base prospectus and final terms), published in accordance with applicable law. Exclusively for potential investors in any EEA Member State that has implemented the Prospectus Regulation (EU) 2017/1129 the Issuer's Base Prospectus (EU) is made available on the Issuer's website under www.21shares.com.

The approval of the Issuer's Base Prospectus (EU) should not be understood as an endorsement by the SFSA of the securities offered or admitted to trading on a regulated market. Eligible potential investors should read the Issuer's Base Prospectus (EU) and the relevant Final Terms before making an investment decision in order to understand the potential risks associated with the decision to invest in the securities. You are about to purchase a product that is not simple and may be difficult to understand.
