

The XDC Network is a blockchain built to make global trade faster, cheaper, and more efficient. As the financial world shifts toward distributed ledger technologies, XDC stands out as a leading platform enabling the tokenization of real-world assets and the modernization of international trade.

Think of it as a digital highway for global finance, making it easier for businesses to move money, exchange goods, and digitize assets than ever before.

XDC Network makes it possible for institutions to leverage smart contracts in a compliant and efficient way, opening up new possibilities for supply chain finance.

XDC, the network's native currency, is used for transactions, smart contract operations, and paying transaction fees on the network.

INVESTMENT CASE FOR XDC

Revolutionizing trade finance

XDC is redefining global trade finance by replacing slow, paper-heavy systems with a scalable, blockchain-based network. As the first crypto member of the International Trade and Forfaiting Association (ITFA) and the Trade Finance Distribution Initiative (TFDi), it streamlines documentation, increases transparency, and improves small and medium-sized enterprises (SMEs) access to financing, helping close a \$5 trillion funding gap in an industry where nearly half of the requests are rejected by traditional banks.

Fast and scalable blockchain for institutions

The XDC Network is purpose-built for institutions, offering seamless integration with legacy financial systems like SWIFT and ISO 20022, standards widely used by banks and financial institutions. XDC is engineered for high-volume use cases such as trade settlement, cross-border payments, and invoice financing. Its full compatibility with Ethereum-based smart contracts and decentralized apps further connects it to the broader blockchain ecosystem.

Collaboration with industry titans

XDC has collaborated with major industry players like Deutsche Telekom, SBI Japan, and Utila. It has also joined the Ubyx Foundation, which is developing stablecoin-based solutions for global settlements. In a landmark move toward institutional adoption, XDC partnered with Archax, a UK-regulated digital asset exchange, to launch tokenized money market fund tokens on its blockchain, bringing institutional-grade assets on-chain.

21SHARES XDC NETWORK ETP

The 21shares XDC Network ETP (ticker “XDCN”) offers investors a liquid way to integrate ETP, which tracks XDC, into their portfolios, allowing them to benefit from XDC’s role in advancing blockchain-powered global trade.

This document is not an offer to sell or a solicitation of an offer to buy or subscribe for securities of 21Shares AG in any jurisdiction. Neither this document nor anything contained herein shall form the basis of, or be relied upon in connection with, any offer or commitment whatsoever or for any other purpose in any jurisdiction. Nothing in this document should be considered investment advice.

This document and the information contained herein are not for distribution in or into (directly or indirectly) the United States, Canada, Australia or Japan or any other jurisdiction in which the distribution or release would be unlawful.

This document does not constitute an offer of securities for sale in or into the United States, Canada, Australia or Japan. The securities of 21Shares AG to which these materials relate have not been and will not be registered under the United States Securities Act of 1933, as amended (the "Securities Act"), and may not be offered or sold in the United States absent registration or an applicable exemption from, or in a transaction not subject to, the registration requirements of the Securities Act. There will not be a public offering of securities in the United States. Neither the US Securities and Exchange Commission nor any securities regulatory authority of any state or other jurisdiction of the United States has approved or disapproved of an investment in the securities or passed on the accuracy or adequacy of the contents of this presentation. Any representation to the contrary is a criminal offence in the United States.

Within the United Kingdom, investments in crypto exchange-traded notes (cETNs) are classified by the Financial Conduct Authority (FCA) as Restricted Mass Market Investments (RMMIs) and are considered high-risk and complex products. You should not invest unless you're prepared to lose all the money invested. cETNs are highly volatile, and you are unlikely to be protected if something goes wrong. These products are not covered by the UK Financial Services Compensation Scheme (FSCS) or the Financial Ombudsman Service (FOS). This is not a recommendation to invest. Any investment decision should be based solely on the official offering documents of the Issuers (such as the approved base prospectus and final terms), published in accordance with applicable law. Exclusively for potential investors in any EEA Member State that has implemented the Prospectus Regulation (EU) 2017/1129 the Issuer's Base Prospectus (EU) is made available on the Issuer's website under www.21shares.com.

The approval of the Issuer's Base Prospectus (EU) should not be understood as an endorsement by the SFSA of the securities offered or admitted to trading on a regulated market. Eligible potential investors should read the Issuer's Base Prospectus (EU) and the relevant Final Terms before making an investment decision in order to understand the potential risks associated with the decision to invest in the securities. You are about to purchase a product that is not simple and may be difficult to understand.
